

P O N D
A N
A L M A N A C K

For the Year of our
L O R D G O D

1 6 9 1.

Being the 3^d after Bissextile or Leap
year, and from the Worlds Creation at
the Spring 5694 years Compleat.

Amplified with many good things
both for pleasure and profit : and fitted for
the Meridian of *Saffron Walden in Essex*,
where the Pole is elevated 52 degrees and
6 minutes above the Horizon.

And may serve indifferently for any other
place of this Kingdom.

C A M B R I D G E,

Printed by *John Hayes* Printer to the
University, 1691.

Pond 1691.

Year 1691, in both Accounts viz.

Julian or
English.

Gregorian or
Forreign.

	1		1
	11	The Epact	1
	20	The Cycle of the Sun	20
Febr.	22		Febr. 25
April	12		April 15
May	21		May 24
May	31		June 3
Novem.	29		Decemb. 2

HE enters ♄, *March* the 10th, at 1 min. past noon, and then begins our Spring Quarter.

He enters ♋, *June* the 11th, 31 min. past 1 in the afternoon, and then begins our Summer Quarter.

He enters ♏, *September* the 13th, 59 min. past 4 in the morning, and then begins our Autumn.

He enters ♑, *December* the 11th, at 11 min. past 10 at night, and then begins our Winter Quarter.

MArriage comes in on the 13 day of January, and at Septuagesima Sunday it is out again untill Low-sunday; at which time it comes in again, and goes not out till Rogation-sunday: thence it is forbidden untill Trinity-sunday, from whence it is unforbidden till Advent-sunday: but then it goes out, and comes not in again till the 13 day of January next following.

The

begins January 23, ends February 12.

begins April 29, ends May 25.

begins June 12, ends July 1.

begins Octob. 23, ends Novemb. 28.

A Table shewing how many years Purchase a Lease or Annuity to endure for any number of years under 30, is worth presently, at interest upon interest, at six in the hundred, and shewing also how to discount any Lease in being, and the true value of the Reversion after any number of years.

Years of a Lease	Years.	Months.	Dec. parts
1	0	11	0
2	1	9	9
3	2	8	1
4	3	5	9
5	4	2	5
6	4	11	0
7	5	7	0
8	6	2	5
9	6	9	6
10	7	4	3
11	7	10	7
12	8	4	6
13	8	10	3
14	9	2	6
15	9	8	5

The Use and Explanation of this Table.

THe first Column at the left hand sheweth the years of a Lease, or Annuity, and right against each year are the years, months, and decimal parts of a months purchase that such a Lease or Annuity is worth.

Example.

Suppose a Lease or Annuity to continue 18 years, and you would know how many years purchase it is worth in ready money, look in the Column of the years of a Lease, for 18 years, and against the same you shall find 10, 9, 9. which shews such a Lease to be worth 10 years,

Years of a Lease.	Years.	Months.	Dec. parts.
16	10	1	3
17	10	5	8
18	10	9	9
19	11	1	3
20	11	5	7
21	11	9	3
22	12	0	5
23	12	3	6
24	12	6	6
25	12	9	4
26	13	0	0
27	13	2	5
28	13	4	9
29	13	7	1
30	13	9	2

9 months, and 9 ten parts of a months purchase. So that the yearly rent being 12 pound, the value will be thus found.

But if you buy the Reversion of a Lease now, as suppose a Lease of 20 years continuance, and you commence

not till 5 years be past, in this and such like cases, look for the present worth of the Lease, as this of 20 years, which will be found worth 11 years, 5 months, 7 tenths of a months purchase, then look the present worth of a Lease of 5 years, which will be found worth 4 years, 2 months, 5 tenths, take this out of 11 5 7 and there remains 7, 3, 2. which are 7 years, 6 months, 2 tenths of a months purchase; and so much is the Reversion of the Lease of 20 years, after 5 years worth be expired.

16	5	4
10 times 12 is	120	0 0
12 ^{lb} in 9 mon. is	9	0 0
in 9 parts is	0	18 0
the value	129	18 0

Full moon the 4 day, 40 min. past 11 in the morning.
Last quarter the 11 day, 55 min. past 6 in the morn.
New moon the 19 day, 8 min. past 10 before noon.
Fist quarter the 27 day, 10 min. past 7 in the morn.

Ye following Months that hold me in disgrace,
Though I be cold, yet must ye give me place;
For in my time it truly came to pass,
That Christ, our Saviour, Circumcised was.

44

January 1691.

Fine season-
able weather
begins the
Year.

Frosty and
cold toward
the new Moon.

About the
end more cold
with snow or
rain.

Uncover as yet roots of Trees where ablaqueation is requisite, Plant Quick-sets, and Transplant Fruit Trees, if not finished. Set Vines, and begin to prune the old, Prune the branches of Orchard fruit Trees, especially the long planted, and that towards the decrease: but for such as are newly planted, they need not be disbranched till the sap begins to stir: In this work cut off all the shoot of *August*, unless the nakedness of the place incline you to spare it:

You may now begin to Nail and Trim your Wall fruit: Cleanse Trees of Moss, &c. the weather moist. Gather Cyons for Graffs before the Buds sprout, and about the latter end Graff them in the stock, Pears, Cherries, and Plums. Set Beans, Pease, &c. In this month forbear Physick, or to let blood, unless necessity constrain; beware of taking cold, for Rheums and Flegm do much increase this month.

Full moon the 2 day, 51 min. past 9 at night.
 Last quarter the 9 day, 9 min. past 12 at night.
 New moon the 18 day, 28 min. past 4 in the morn.
 First quarter the 25 day, 39 min. past 5 at night.

Cold and
 frosty with
 some variety
 of weather
 about this
 time.

Very good
 seasonable
 weather.

More boiste-
 rous weather
 with storms
 of snow or
 rain at the
 end of this
 month.

In this month remove Graffs of former years Graffing, Cut and lay Quick-lets, Plant Vines as yet and Hops, and fruit that grows on bunches. Set all sorts of kernels and strong Seeds, also sow beans, Pease Corn-saliet, Marigold, Anny-seeds, Radish; Parsnips, Carrots, Onions, Garlick. Rub Moss off your Trees after a soaking rain, and scrape and cleanse them of Cankers. Cut off the Webs of Caterpillars from the tops of Twigs and Trees to burn. Parsly, Spinage and other hardy Pot herbs may now be planted. Half open your passages for the Bees, but continue to feed weak Stocks.

Be still sparing in Physick, or to let Bloud without necessity, and be carefull not to catch cold when the weather flatters with warmth.

March hath xxxi days.

Full moon the 4 day, 25 min past 8 in the morning.

Last quarter the 11 day, 30 min. past 6 at night.

New moon the 19 day, 52 min past 7 at night.

First quarter 27 day, 36 min. past 1 in the morning.

March am I call'd that stormy Winds am bringing,
Yet in my time all Fruits and Buds are springing:
A joyfull Month, thus I deserve the praise,
Though many bob me with my borrowing days.

44

March 1691.

Windy tem-
pestuous wea-
therbut not
very cold.

About this
time we may
expect some
frosly mor-
nings with
storms of snow
or hail.

Windy and
dry.

You may as yet cut Quick-sets,
and cover such Tree-roots as you
laid bare in *Autumn*; sow Oats, Bar-
ly, Parsnips, Onions, Carrots, Mel-
lons, Cucumbers, &c. Graff all this
month, beginning with Pears, and
ending with Apples, unless the Spring
prove extraordinary forwards. Prune
last Years Graffs, and Cut off the
heads of your budded Stocks. It were
profitable now also to top your Rose-
Trees a little with your knife near
a leaf bud, and to Prune off the dead
and withered branches, keeping them
lower then the custome is, and to a
single Stem.

Slip and Set Sage, Rosemary, La-
vender Thyme, &c. Mid-March dress
up and string your Straw-berry beds.
It is now seasonable to purge and let
bloud about the 20 of this month,
there are such changes in the Air, yet
it's generally very sickly; and there-
fore be specially carefull of your
health at that time.

Full moon the 2 day, 22 min. past 7 at night.
 Last quarter the 10 day, 5 min. past 1 in the after noon.
 New moon the 18 day, 40 min. past 9 at night.
 First quarter the 25 day, 4 min. past 7 at night.

22
23 Black Clouds
24 with storms
25 of hail and
26 thunder.

Now is the time to sow Hemp, and
Flax, (Pole Hops,) Sweet Marjo-
ram, Hysop, Thyme, Winterfavory,
Scurvy-grass, Lettice, Purllian, Rad-
dith, &c. Plant Artichoke-slips, and
set French Beans, you may slip La-
vender, Thyme, Penceroyal, Sage,
Rosemary, &c.

Gather up worms and snails in
your garden after Evening showers,
continue this after all Summer
rains. Open your Bee-hives, for
now they hatch: Bark Trees for
Tanners. The use of Physick is
now seasonable, as also Purging
and Bloud-letting.

Sow sweet Marjoran, Thyme, and
those Herbs and Plants which are
most tender; now distil Plants for
waters, Spirits, &c. Continue weed-
ing before they run to seeds, weed
also your Hop Gardens and Corn,
and walk in the Fields and Gardens
early in the Morning,

Now set your Bees at full liber-
ty, look out often, and expect swarms.
Plant your Carnations and Gilly-
flowers after mid-day about this sea-
son. Plant also your Stock Gilly-
flowers in Beds at full Moon. Whey
Clarified with Sage, Scurvy grass
Ale, and Worm-wood Beer are
wholesom drinks.

Last quarter the 8 day, 46 min. past 10 at night.
 New moon the 16 day, 38 min. past 2 in the morn.
 First quarter the 22 day, 24 min. past 4 after noon.
 Full moon the 30 day, 26 min. past 10 at night.

Though with my Speeches ye be all offended,
Yet I must tell ye, June is much commended :
For in my time of Fruits the Earth is full,
And they that want are clothed with my wooll.

June 1691.

Hot seasonable
weather with
fine warm
showers.

Now some-
what dry
weather.

Toward the
full Moon,
increase of
heat, yet show-
ers with thun-
der may be
expected.

Sow Lettice, Chervile, Radish,
&c. to have young and tender sal-
leting. Gather Herbs in the Full
Moon to keep dry ; they keep and
retain their vertue and sweet smell
better, if dryed in the shade, than
in the Sun, whatever some pretend.
Set Rosemary and Gilliflowers 3 or 4
days after the Full, and they will not
run to seed. Look to your Bees for
Swarms and Casts, and begin to de-
stroy Insects in your Garden with
Hoofs, Canes, and tempting Baits ;
gather snails after Rain, &c.

Thin and light Diet, and chaste
thoughts tend to health : Lie not un-
advisedly on the ground, nor over
hastily drink.

July hath xxxi days.

Last quarter the 8 day, 2 min past 1 in the after noon.

New moon the 15 day, 49 min past 9 at night.

First quarter the 22 day, 43 min. past 1 after noon

Full moon the 30 day, 29 min. past 1 in the after noon.

Sun-rising.

Sun-setting.

And to my praise let me these words repeat,
All Earthly fruits are ripened with my heat
For Men and Beasts, so that the Common cry
Goes still abroad, for feeding Who but I.

July 1691.

1
2
3 Hot sultry
4 weather at the
5 beginning of
6 the month.

7
8
9
10
11
12
13 In this month, fallow your Land
14 for Wheat, pull up Hemp that is ripe,
15 get Rue and Wormwood to drive
16 away Fleas and Moths; dry Flowers
17 in the shade and then Sun them a
18 little for fear of corruption; perfume
19 your house with sweet favours, and
20 defend your self from stinks in the
21 streets.

13 Very good
14 seasonable
15 weather for
16 making hay.

17
18
19
20
21
22
23 Forbear superfluous drinking, but
24 eat heartily; use cold Herbs and
25 Meat, abstain from Physick. Perfume
26 your house every morning with Tar,
use Carduus Benedictus boiled, and
drink fasting.

23 Variable wea-
24 ther with some
25 thunder:
26

August hath xxxi days.

Last quarter the 7 day, 6 min. past 1 in the morn.
 New moon the 13 day, 50 min. past 4 after noon.
 First quarter the 20 day, 22 min. past 2 after noon.
 Full moon the 28 day, 16 min. past 5 after noon.

I am ever hot with brightness of the Sun,
And in my Month the chiefeſt work is done ;
I Cut and Reap, and get for Man and Beaſt,
Then of all Months why ſhould I be the leaſt ?

August 1691.

Very haſty
ſhowers and
hot.

Good harveſt
weather about
this time.

Hot and moiſt
with high
winds.

Black Clouds
with thunder.

This month reap Wheat and Rye,
cut down your Oats and Barley that
is ripe, gather Garden-ſeeds, ſow
Corn-fallet, Marigolds, Lettice,
Carrots, Parſneps, Turneps, Spinage,
Onions : Likewise now pull up ripe
Onions and Garlick.

This month uſe moderate diet,
forbear to ſleep preſently after meat,
for that brings Opilations, Headach,
Agues, and Catahrs, and other Di-
ſtempers of the ſame kind ; take heed
of ſudden Cold after great Heats.

Last quarter the 5 day, at 11 in the forenoon.
 New Moon the 12 day, 13 min. past 1 in the morning.
 First quarter the 19 day, 13 min. past 6 in the morn
 Full moon the 27 day, 8 min. past 9 in the forenoon

Gather now (if ripe) your winter Fruits, as Apples, Pears, Plums, &c. to prevent their falling by the great winds. Also gather your wind-falls from day to day: do this work in dry weather.

Set Artichoaks, sow seeds for winter Herbs, gather Hops, about the full of the moon the weather being dry, cut Quick-sets, sow Wheat and Rye, kill Bees, make Verjuice, sow Parsnips and Carrots, remove and set slips of Flowers, set Roses, Strawberries and Barberries, &c.

October hath xxxi. days.

Last quarter the 4 day, 42 min. past 6 at night.
 New moon the 11 day, 4 min past 1 after noon.
 First quarter the 19 day, 9 min past 1 in the morn.
 Full moon the 26 day, 29 min past 12 at night.

Remove young Plants and Trees
in the new of the moon, and about
the full of the moon, gather such
fruit as you left ungathered the last
month; set all kind of Nuts and A-
corns, and cut your Rose trees but
once in two years, if you would have
store of Roses.

Provide warm Cloaths now, and
consult as well the Taylors as Phy-
sitians.

November hath xxx days.

Last quarter the 3 day, 42 min. past 1 in the morning.
 New moon the 9 day, 15 min. past 12 at night.
 First quarter the 17 day, 44 min. past 9 at night.
 Full moon the 25 day, 30 min. past 2 after noon.

Sun-rising

Sun-setting

By me learn that the pleasures of our Age
Are like unto a Play upon a Stage,
See how my Leaves do wither dye and fall,
Even so in time must Earthly creatures all.

November 1691.

Gloomy weather at the beginning, inclining to frost soon after.

Variable weather with snow or rain.

Very good moderate weather for the season.

In the new moon remove young Trees, set Crab-tree stocks to graft on the following Year, and at the decrease or old of the moon sow and set early Beans and Pease; trench and fit ground for Artichoaks, &c. Make Mault, kill Hogs, and make Martimas Beef.

Use good Meat, and wholesome Drinks to nourish the Bloud, and be sure to go dry of your feet; for if not (unless you be used to it) you'll be certainly troubled with Rheums, and Cold, &c. If any distemper afflict the Body, finish your Phylick this month, and so rest 'till March, unless necessity urge.

December hath xxvi days.

Last quarter the 2 day, 54 min. past 8 in the morn.

New moon the 9 day, 51 min. past 1 after noon.

First quarter the 17 day, 33 min. past 6 at night.

Full moon the 25 day, 9 min past 3 in the morn.

Last quarter the 31 day, 29 min. past 4 after noon.

Now let me speak although I come behind,
Yet of all Months *December* have in mind ;
For in my time was our Redeemer born
To help, and save Man-kind that was forlorn.

December 1691.

Windy and
cold raw
weather.

Expect some
frost and snow
about this
time.

Mild for the
season and so
continues to
the end of
the Year.

In this month and also in the next
fell great Timber in the decrease of
the moon, for then it being driest
will last the longer ; uncover the
roots of your fruit-trees, you may
now plant Vines, also stocks for graf-
sing, set all sorts of Kernels, Stones,
&c. All this month you may conti-
nue to trench and dung ground, to
be ready for the Planting of Fruit-
Trees, &c. Either late in this month,
or in *January* Prune and Cut off your
Vine shoots to the very Root.

Let the Kitchen be thy Apothe-
caries shop, hot meats and broths
thy Physick.

Pond 1691.

The Year, Month, and Day, The number of Years, Months, and Days, that every King and Queen of Eng. since the Conquest began their reign. The num. of Y. expired in this Y. as also to a month since they ended,

The Use of the Table in Example.

King Henry 8 began his Reign in the Year of Christ 1509, April 21 He Reigned 37 Years, 10 months, and 2 days. It is since he began his Reign 182 years complet the 22 of April his year 1691. Now to know the time since the end of his Reign, before his name standing on the right hand, you shall there find 144 Years since he died, Jan. 28 And so of the rest.

The

*The Explanation and use of the foregoing Table,
with some observations of England.*

THE Table consisting of several Columns, is plain and easie; in the first column towards the left hand, is a Catalogue of all the Shires in *England and Wales*, right against each of which, under their proper Titles, are the number of Parliament Men, Hundreds, Market-Towns, and Parishes contained in the same, as also the Length, Breadth, and Circumference of the Shire, with the Name of the Chief Town thereof, and its Distance and Situation from *Cambridge*.

As for Example,

I desire to know all the forementioned things, in or belonging to *Norfolk*, I look for *Norfolk* in the first column (the Shires being in an Alphabetical order) and right against the same I find, 12 Parliament Men, 31 Hundreds, 28 Market-Towns, 669 Parish. its length 50 miles, breadth 30, circumference 240, the chief Town *Norwich*, its distance from *Cambridge* 49 miles, and its situation from thence North East, signified by N. E. thus in like manner is to be done for any other Place.

England, being the Chiefest and Pleasantest part of Great Britain is trebly divided, 1. into six Circuits destinated to the Itinerary Judges, 2. into 22 Episcopal Diocesses, 3. into 40 Shires; the Shires were first made by King *Alfred*, for the easier and speedy administration of Justice. This King also divided his Subjects into Tens, or Tythings, every of which severally, should give bond for the good behaviour of each other; ten of the nighest Tythings made the Lesser division which we call Hundred, which name cannot be derived from the number of Villages, none of our Hundreds being so large: these Hundreds are called Wards in *Cumberland*, *Westmorland*, *Darham*, *Nor*

Pond 1691.

Northumberland: in every Hundred ther's a Constable called the Constable of the Hundred, who receives Warrants from the Sheriffs, or Justices, and dispatches them to the Constables of each Town and Village in his Hundred, for the effecting of publick busineses. To enumerate the pleasures and ornaments of *England*, requires more room than there is allotted, therefore it may suffice to expresse some of her Excellencies in these verses, viz.

*England is stor'd with Mountains, Bridges, Weald,
With Churches, Rivers, Women beautifull.*

Of the Eclipses this Year.

IN this year will happen two Eclipses of the Sun, but none of the moon.

The first Eclipse of the Sun, will be on *February* the 8th, about five of the Clock in the morning, but it will be invisible to us in *England*, the Sun being *sub terra* at that time.

The second Eclipse of the Sun will happen on *August* the 13th, near six of the Clock at night; it is Celebrated in one degree of *Virgo*, and will be visible to us in *England* if the Air be serene: it will be a great Eclipse, for three Fourths of the Suns body will be obicured.

On the 25th of *July* is Celebrated a famous Opposition of *Saturn* and *Mars*; one of them is with the *Pleiades*, the other in Opposition to that turbulent Constellation. The effects whereof will not only be seen in the Air, but in the Actions and Passions of humane kind; I mean that part of them that are subject to those Signs where the ♄ is, viz. ♋, and ♊.

Of Earthquakes.

When much wind is gotten into the Bowels of the Earth, and afterwards breaking forth, causeth the Earthquake or shaking of the Earth; and sometimes by the violent eruption of the windy exhalation out of the Earth, it casteth up the Earth into the Air, and at other times it causeth the Land to sink a great depth, swallowing up whole Cities and Towns, yea and also great Hills and Mountains, leaving in place thereof, great holes or lakes of water: But more particularly, Earthquakes are distinguished into four kinds.

The first is a trembling only of some part of the Earth, and if the exhalation be great, it heaveth and lifeth it up, which is caused by the violence of the wind; striving to get upward; but afterward getting out of its prison, the Earth that was lifted up returneth to its old place.

Sometime again when the exhalation that is gotten into the Bowels of the Earth is great and vehement, it causeth the Earth to gape and cleave asunder, whereby often famous and renowned Cities (as Histories relate) have been swallowed up into the Earth and never seen again, there after appearing nothing in place thereof, but some deep gulfe or hole.

Again, at other times it happeneth that when some part of the Land sinketh down, that there ariseth in place thereof Waters and Lakes; and sometimes Fire breaketh forth with Smoake to the terrour of the beholders.

Now the Signs of an Earthquake presently to ensue, are these; The raging of the Sea in a calm time, when there are no winds to disturb it. Strange noises like to armed Men, and a groaning or a mournfull sound within the Earth. Great quietness in the Air. When the Sun is seen certain days to be more dim and obscure then ordinary; which is caused by the absence of the winds that should have purged the gross Air, which is then inclosed

Pond 1691.

ted in the Bowels of the Earth. Also when Waters in Wells or Pits are troubled, and the savour and salt thereof infectious, which is caused by the pestilent exhalations that are then inclosed within the Bowels of the Earth, which then begins to seek for passage, and spread themselves abroad. And thus much of Earthquakes and their Causes.

Of Thunder.

THunder is an exhalation hot and dry, which being drawn up into the middle Region of Air, and there inclosed in the body of a thick cold Cloud (so that the hotness of the exhalation cannot agree with the coldness of the place) it suddenly breaketh out and renderth the Cloud asunder: which violent eruption maketh a noise like the rending of Cloath, or the quenching of a hot iron in cold water, which we call Thunder: Yet if the exhalation be small and the Cloud in all places not of quall thickness, then it breaketh out of those places with a kind of huzzing only: But if the exhalation be great in quantity, and very hot and dry in quality, and the Clouds also very thick and apt to retain it, that it cannot easily escape out, it doth so vehemently shake the Clouds, that it causeth a terrible noise and rumbling, like the Crack of a great Gun, especially when it bursteth the Cloud asunder, and hath liberty to pass into the open Air; in so much that the Cloud being thus broken and dissolved by the heat of the exhalation, it falleth downwards and then follows (for the most part) a violent shoure of Rain. Sometimes it engendreth a small Stone which falleth upon the Earth, doing oftentimes much mischief: Many times the violent eruption of the exhalation engangers high places, as Turrets, Steeples, Trees, and setteth them on Fire, as St. Paul's Steeple in London can witness which Anno Dom. 1561. June 4th was set on fire thereby,

Pond 1691.

thereby, and burned, as it had been once or twice before. Yet is Thunder very profitable not only for the sweet Showers of Rain that do accompany it, but chiefly for that it purgeth and purifieth the Air, by the thinnets of the exhalation that forceth its passage through it,

Of the Rain-Bow.

THE Raine-bow is caused by the beams of the Sun Striking upon a hollow thin and moist Cloud, which is always opposite to the Sun, wherein (according to the thinnets or thickness of the Cloud) doth appear to the Eye several Colours, as of Red, Yellow, and Green: And although the Raine-bow have a natural cause, yet it is appointed by GOD (who of his infinite goodness and mercy towards us Mortals here on Earth) to be a Sign that the World shall no more perish by that Universal deluge of Waters.

Of Comets or Blazing Stars.

A Comet or Blazing Star is an exhalation hot and dry, and of a Thick, Fat, and Gross matter, great in quantity and hard, compact together like a lump of Pitch; which being carried in the highest region of the Air, is by the excessive heat of the place set on fire, and appears like a great Star with a long Tail often times, and so burneth till the substance of it is consumed.

Now for the Colour, wee usually observe Three sorts or differences, namely White, Ruddy, and Blew; which ariseth from the matter of which it is compact; for if it be thin, the colour is White and Waterish; if of indifferent thickness, it appears ruddy; but when the matter thereof is very thick, it seems blew.

Pond 1691.

In like manner Comets are of Three sorts or fashions: for sometimes they are Round, having Circumambuent Rays; and that is when the substance of the exhalations is thickest in the middle, and thin about the sides. The second is with a Beard or Brush Taile streaming downward; which is when the matter thereof is thick above, and thin below. The third sort is like the second saving that the Tail extendeth out side-long in length. And here you are to Note, that for the time of their lasting, some are of longer continuance than others, according to the quantity of the Exhalation; for some last but a week, some 20, 30, 40, or 50 days; but scarce ever any that shine less then seven days, or more then six months, being most commonly generated in Autumn, or end of Harvest. They are Signs of Drought, Dearth, scarcity of Fruit, Sicknes, and epidemical Diseases: As also (as many affirm) they are said to betoken Earthquakes, Winds, Warlike-Stratagems, Seditions, Changes of Government, and the Death of Kings, and Queens, and Potentates, as Pontanus observes.

Prodromus est Belli, pestisque, famisque, Cometa,

Ventorum quoque certa dabunt tibi signa Cometa.

Illi etiam Belli motus feraque arma ministrant.

Magnorum & clades Populorum, & funera Regum

Aquarum significant penuriam, &c.

The

Pand 1691.

The names of the principall Fairs in England and Wales, together set forth; with the Month, Day, and place where they be kept, more largely then heretofore.

January.

THE 3 day at Llanibithew, the 5 day at Hickerford in Lancashire. The 6 day, being Twelfth day, at Salisbury, at Bristow. The 7 day at Llanginny. The 25 day at Bristol, Churchingford, at Gravesend. The 31 at Llandysfell.

February.

The 1 day at Bromley in Lancashire. The 3 day at Bath, at Bigglesworth, at Bugworth, at Farindon, at Codlemew, at Lin, at Maidstone, at Reading, at Becklesfield, at the Vizes in Wiltshire, at Whiteland. The 3 at Boxgrove, at Brimley. The 6 at Stafford, for six days, for all kind of Merchandize, without Arrests. The 8 at Tragaron. The 9 at Landaffe. The 14 at Oundle in Northamptonshire, Feversham. The 24 at Baldock, Bourn, Froom, Henly upon Thames, Higham-ferries, Tewksbury, Uppingham, Walden. The 26 at Stanford, an Horse-Fair.

March.

The 1st Langadog, at Llangevella, at Madrim. The 3 at Bremwel-braks in Norfolk. The 4 at Bedford, at Oakham. The 8 at Tragarron. The 12 at Spaford, at Stamford, at Sudbury, at Wooburn, at Wrexham, at Bodnam and Alsome in Norfolk. The 13 at Wye, at Bodwin in Cornwall, at Mounthowin. The 17 at Patrington. The 18 at Sturbridge. The 20 at Alesbury, at Durham. The 24 at Llanerchemith. The 25 at S. Albones, at Althwa in Hertfordshire, at Burton upon Trent, at Cardigan, at Cattwilden in Essex, at Huntington, at S. Jones in Worc. at Malden, at Malpas, at Newcastle, at Northampton, at Onay in Bucking, at Woodstock, at Whiteland, at great Chart. The 30 at Malmesbury.

April.

The 2 at Hitchin, Northfleet, at Rochford. The 3 at Leek in Staffordshire. The 5 at Wallingford. The 7 at Derby. The 9 at Bellingworth. The 22 at Stabford. The 23 at Amptil, at Rewdley, at Eywton, at Bristock, at Bilson, at Bury in Lancashire, at Castle-gombs, at Charing, at Chichester, at Engfield in Sussex, at Gilsford

Pond 1691.

at Bishops-Hatfield, at Hinningham, at Ipswich, at Kilborough, at Louquer, at Northampton, at Nutlay in Suffex. at S. Pombey, at Sabrigworth, Tamworth, at Wilton, at Wortham, at Riliborough, at Hartin in Norfolk, at Sapsar in Hartfordshire. The 25 at Bourn in Lincolnshire, at Buckingham, at Calne in Wiltshire, at Cliffe in Suffex, at Colebrook, at Dunmow in Essex, at Darby, at Innings in Buckinghamshire, at Oakham, at Uttoxeter, at Winchcombe. The 26 at Tenderden in Kent, at Cleve.

May.

The 1 at Andover, at Brickhill, at Blackburn in Lancashire at Chelmsford, at Congerton in Cheshire, at Fockingham, at Grig-howel, at Kimar, at Leighton, at Leicester, at Lichfield, if not on Sunday, at Lexfield in Suffolk, at Linfield, at Liatriscent, at Louth, at Maidston, at Ocestry in Shrop. at Perin. at Philipsnorton, Pom-bridge, at Reading. at Rippon, at Stansted, at Stow the Old, at Stocknailand, at Tuxford in the Clay, at Uske, at Haverill, at War-wick, at Wendover, at Worsworth. The 2 at Powlicheley in Car-marthenshire. The 3 at Abergavenny, at Ashborn Peak, at Arundell, Bramyard, at Bala, at Chersey near Oatlands, at Chipnam. at Church-Stretton in Shropshire, at Cowbridge in Glamorganshire, at Derby, at Denbigh, at Elstow by Bedford, at Hinningham, at Merthir, at Mounton, at Noneaton, at Huddersfield, at Rarsdale in Lancashire, at Tidnell, at Waltham-Abbey, at Thetford in Nor-folk. The 5 at Merchenleth in Mountgom. The 6 at Almesbury, at Althford, Hoy. Knighton. The 7 at Bath, at Beverley, Hanslop, Newton in Lancashire, Hatesbury, Oxford, Stratford upon Ayon. The 8 at Maidston. The 10 at Althurn in the Peak. The 11 at Dunstable. The 12 at Greys-Thorrock in Essex. The 13 at Bala in Meri-ton. The 15 at Welchpoolin Mountgom. The 16 at Llangarranage in Cardigan.
